- Built-in support for Flash™ animations
- Built-in support for HTML page capture

Xtreme Software

- Includes professional MediaZone playlist/ media set editor program
- Includes broadcast-quality 24-bit character generator (MediaCreator CG)

Turnkey Automated Playout Server with Composite Video / DVI / RGBH/V Output and Includes MediaZone and MediaCreator Software

MediaXtreme Broadcast is one of the most exciting developments in the world of automated television to come along in several years because it allows users to aggregate external data into a robust media playlist—all in one box! MediaXtreme Broadcast is all you need to create a television channel that advertises, informs, entertains and alerts your viewers with the most up-to-date information.

Of course, if all this came at a high price and required expensive and extensive training, MediaXtreme Broadcast would not be much different than some of our best competitors.

Here's the deal: After delivering thousands of MediaXtremes worldwide, we are so confident that MediaXtreme Broadcast will meet your needs for a cost-effective television playout solution, we now offer FREE support and training with every purchase. Yes, it is that easy to use, and it is that reliable.

MediaXtreme Broadcast (MXB-A) comes with a built-in video player, character generator, crawl generator and logo inserter. Additionally, a comprehensive media scheduler is provided and supports a wide variety of media files for scheduled playback of individual media or sets.

Building your television program is quick and easy with MediaXtreme's exclusive MediaZone editor. Simply import media assets from the clipboard and place them into the user-configurable template. Media assets can be configured to run full-screen or in a "zone," giving you the look and feel of a broadcast network channel.

As you can see, MediaXtreme Broadcast has raised the bar when it comes to automated playout servers. It is a proven champion that has satisfied even the most demanding requirements—all this at a price that makes it an exceptional value. Why not put the power and flexibility of X to work for you?

Our No Worry Warranty

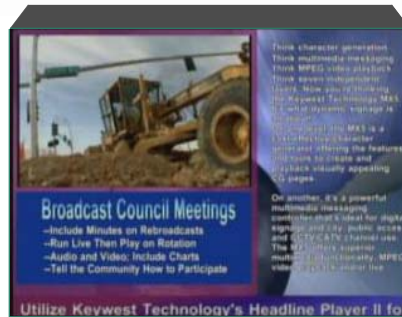

Comes with MediaXtreme Broadcast

MediaZone Editor

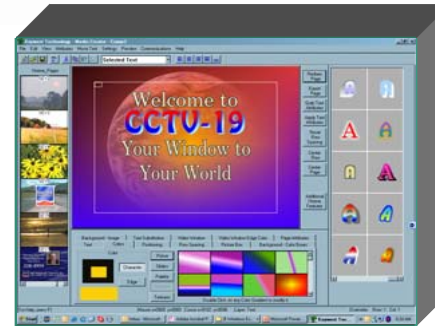

Control your TV channel over a network with MediaZone, an easy-to-use GUI that assembles media and produces professional results without rendering.

Robust Results

The MediaXtreme comes with many inputs, such as HTML, RSS feeds and weather data that are assimilated for realtime video layout.

MediaCreator CG

The CG TTF fonts, crawls, scrolls, logos, and graphics are directly supported by the MediaZone editor making time-wasting conversions unnecessary.
