

# HD MPO CASSETTE

The HD family uses a similar modular design to our CCH spec cassette, but with a much smaller dimension to achieve higher fiber density. HD hardware can hold 96 fibers in a 1U, 192 fiber in a 2U, and 384 fibers in a 4U.

## HD MPO MODULES

Standard with low loss connectors and enhanced optical fiber. Available in any fiber and connector type. Modules are available in polarities A, B or C.
