

How are you responding, now that multi-screen streaming video is the norm and subscriber expectations are challenging you to deliver program content to any device, in the home or network?

Live and on-demand streaming video now touches every part of our daily lives. MVPD's are now competing with OTT Multiscreen Service Providers such as: Hulu + LiveTV, YouTube TV, Amazon Prime Video, Netflix, Disney+, Sling TV, AT&T TV Now, T-Mobile TVision, CBS All Access, ESPN+, HBO Now, Showtime, Starz, MLB, Fubo, Philo, Apple TV, Tubi, XUMO,

**Maybe it's time the journey begins with your Next-Gen video offering.....
Managed, legacy IPTV/QAM video, &/or multi-screen delivery with transport rights!**

With your own Next-Gen, branded, IP video service offering with a, **pay-as-you-grow (per sub/per month) model**, you can satisfy your subscribers growing demand for multichannel - multiscreen streaming video programming & offer them a reason to stay connected while fighting cord-cutting OTT services, reducing your CAPEX & churn, while boosting your profitability & subscriber QoE?

MHz *Your complete Next-Gen video offering.....*
MEGA HERTZ *A hosted & fully managed, legacy QAM, IPTV & Multi-Screen video delivery platform with transport rights!*

For more information, please call 800-883-8839

MHz and **EPlus Premier** can provide Multi-channel Video Programming Distributors (MVPD's) **with a customized channel line-up for quickly and reliably launching new ABR Multi-Screen service**, as well as, **replace or retire legacy HITS, IPTV or QAM based MPEG 2/4 linear feeds**. Eplus Premier is a "unique" IP video headend management service with a pay-as-you-grow (per sub/per month) model.

Call **MHz** **MEGA HERTZ** at 800-883-8839 and get started today!

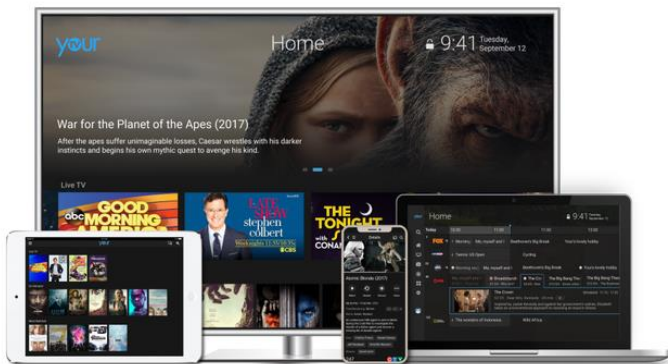

This is what you can count on!

Most National channels are received at the **EPlus** facility. Any National channels not available at EPlus along with your local channels (OTA, PEG), need to be delivered from the MVPD location over a Private link to the **EPlus** facility, in an agreed MPEG2 TS format.

- Streams are then processed using Harmonic's award-winning VOS® media processing platform & packaged in the appropriate formats;
- are time-shift ready - nPVR - for Catch-up, Start-over services and available for a 3-day period;
- supports creation of private copy – nDVR – and storage for a period of 90 days & 100 hours/subscriber;
- support VOD assets which will be uploaded by you or a third party to an agreed AWS S3 bucket and will be accessed by the hosted solution as dictated by the CMS;
- supports blackout management;
- supports optional dynamic ad insertion (DAI) – which is charged by the impression and is cumulative across all channels (CPM);
- EAS management through your chosen CMS.

Your licensed content is then encrypted and transported over secure private links back to your facility for on-demand **multi-screen or live linear program services.**

Eplus is compatible with the Minerva Your TV on-site or cloud-based content management solution, as well as, other (CMS) - middleware/DRM, for a seamless end-to-end next-gen BYOD video service.

The **EPlus** facility in Jackson, Tennessee is a secure, video redundant, resilient and a professionally managed technical infrastructure you can depend-on for your next-gen video service!
